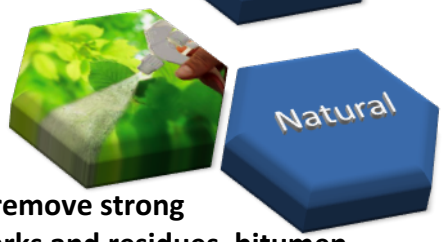
Crioch Industries

Fast and Cost Effective Parts Cleaning for the Automotive Industry with CB100 & CB100 Alu



An effective alternative to harmful solvents and paraffin baths.

The perfect natural, organic parts washing solution to every requirement.

An ideal cost effective solution for regular or occasional parts cleaning.

I've used the CB100 Alu product together with the Bio Circle Clean Box since May 2015. It's the perfect degreaser meeting all our cleaning needs.

Andrew Forsyth,
Complete Auto Repair Centre, Kelso

CB 100 & CB100 Alu solutions will remove strong contaminations, such as rubber marks and residues, bitumen and wax residues, grease, oil carbon, soot, and pastes from steel, stainless steel, aluminium, non-ferrous metals, and other surfaces.

CB 100 & CB100 Alu solutions are extremely flexible and can be used hot or cold together with ultrasonic devices, parts washers, our clean box system, or applied manually using a cloth, paintbrush or washing brush. After cleaning, the surface can easily be wiped off with a cloth.
